.. Spring ..

1903

OTTAWA, 15th January, 1903.

IN presenting our **Seventh Annual Catalogue** we take pleasure in this opportunity to thank our customers for their liberal patronage in the past. Our trade has increased beyond our most sanguine expectations, and we trust that with our increased facilities and our strict personal attention to all business intrusted to us, that we will merit the confidence of our customers and deserve a growing and satisfactory connection.

Our stocks are now as complete as the exigencies of the past season will permit them to be. Many seeds, notably Beets, Beans, Corn and Peas, are scarce and high-priced this spring, and there is a positive famine in Cucumber, Melon and the most of vine seeds. We will fill all general orders, however, to the best of our ability, while the stocks secured hold out. At the same time we would advise our customers not to make any needless delay in ordering their requirements.

We are direct importers, and we use the greatest care in selecting our seeds from the most reliable growers.

We test the seeds we offer, and use every precaution to send out seeds that will give entire satisfaction. We give no warranty, however, as to description or quality of any Seeds or Plants we send out, and will not be responsible or in any way liable for any loss arising from any failure thereof. All Seeds or Plants bought from Graham Bros. must be accepted on these conditions or returned.

When cash accompanies order we pay Freight, Express or Postage on all Seeds priced in this list, by the pound, ounce or packet, to any **Railway Station** or **Post Office** in Canada, except where specially noted, such as Beans, Peas, Corn, Clovers, Grasses, Bird Seeds, &c.

This variety ripens in Canada. It grows nearly four feet in height, heavily podded and has yielded over ten tons per acre. It is a very valuable fodder variety, either for curing, feeding green or for the silo in mixture with Corn. It is a rich, nitrogenous food, is unsurpassed as a flesh former, and, like the Clovers, is a soil improver. Sow broadcast 30 lbs. per acre or plant in drills 2 ft. apart 1 ft. between plants. **Lb. 15c, postpaid 20c; 10 lbs. \$1.00.**

SPELTZ

'**SPELTZ**' is claimed to be ahead of Corn, superior to Oats and more profitable than Wheat. **Yields 80 to 100 bushels** of richer food than Corn, besides giving as much as **4 tons** of good hay per acre.
